

Kitchens

Every project done with Tony Trapp Remodeling involves personalized design and expert workmanship, as well as all the necessary permits, approvals, materials, labor and clean up. Appliances and furnishings are not included in the budgets shown here, which are meant to give you an idea of the scope of each project.

Refresh

\$15,000–\$50,000

A kitchen reface improves the appearance of your kitchen while keeping the same overall layout. Your project might include minor adjustments and repairs, such as making space for a larger appliance, exchanging a range hood for a microwave, or modifying the cabinet height. This is also a great time to improve your kitchen experience by adding outlets, and overhead or under-cabinet lighting. You can choose new doors and drawer fronts for the outside of your existing cabinets, change colors, woods, styles, and cabinet hardware. Installing features, like full-extension glides, or rollout trays, will restore functionality to your cabinets. An accent backsplash or new countertops often add the finishing touches, especially when paired with popular hardwood, cork, tile, or luxury vinyl flooring choices.

Redesign

\$50,000–\$120,000

A full kitchen remodel involves completely redesigning your kitchen. You can change the layout, move appliances, add a storage area, or possibly open the kitchen up to an adjoining room. We help you develop a comprehensive design that blends harmoniously with your home's style and incorporates all the necessities. You may select new cabinets, countertops, sink and faucet, backsplashes, flooring, paint, and lighting, adding features such as quartz countertops or hardwood floors. Many people remove the soffit to make space for taller, more spacious cabinets, and choose soft-close cabinet hardware and special features such as spice racks, lazy susans and built-in recycling areas.

Kitchens

Custom

\$120,000 and up

A larger renovation may require the addition, removal or rearranging of walls and rooms, or a significant amount of custom craftsmanship, including solid wood cabinetry, the matching of existing trim, flooring or accents in older homes, or signature built-ins.

Perhaps you're imagining a new sunporch off the kitchen as a breakfast spot, a walk-in pantry, or center island with a second sink and seating. Since a countertop is both a work surface and a focal point, splurging on a luxury stone countertop may make sense.

Other special finishes might include rich wood flooring, distinctive wall and ceiling finishes, and sophisticated lighting.

Bathrooms

Update

\$8,000–\$25,000

Bathroom updates in this budget range typically focus on one major area of the room, and might involve repairs of areas damaged by leaks. You may want new tiles, fixtures and handrails in the shower, as shown in the photo here. In some bathrooms updating the flooring, lighting, vanity, sink, and faucet might be all that's needed to get a whole new look.

Remodel

\$25,000–\$38,000

A full bath remodel involves removing and replacing everything in the bathroom including the tub, sink, toilet, fixtures, flooring, and cabinets. We do a full electrical update allowing for lighting redesign, and often replace insulation on exterior walls, repair any rot damage, and replace windows. You can choose a new tub, sink, toilet, and vanity, as well as tile and flooring, and may want to include special features such as heated tiles or shower benches.

Indulge

\$38,000 and up

This level of bath remodel often encompasses a larger area than a typical bathroom, and includes a separate shower and bathtub and a spa-like feel. We'll help you to design a room with your chosen cabinetry, flooring, vanity, tile and designer fixtures, and discuss amenities such as heated flooring, a steam shower, heated towel bars, and custom glass. This level of customization results in a luxurious space where you can truly relax.
